Luis Emilio Infante Grimaldo

Designer & Creative

Luis Emilio Infante Grimaldo is a **visual artist, designer, and flower designer** who transforms ideas into expressive, emotionally resonant experiences. He combines **typography, illustration, visual storytelling, and cultural influence** to help people communicate their ideas more clearly, applying design principles across both **physical and digital spaces**. Beyond graphic design, his practice includes painting, illustration, sculpture, and floral artistry, and across all mediums he approaches **creativity as a communication tool**, using aesthetics with intention to craft clear, meaningful messages that **connect visually and emotionally**. Inspired by **nature, surrealism, and art history**, Luis approaches every project as a space to explore, experiment, and delight, using color, form, and storytelling to create connections that are **immersive, vibrant, and a little magical**. His practice is driven by curiosity and imagination, always seeking new ways to make ideas **visible, unforgettable, and full of wonder**.
